# ABOUT COMPANY

MedNova is an Omani startup specializing in the development of smart rehabilitation technologies. The company aims to transform the healthcare sector by integrating artificial intelligence and wearable technologies into the rehabilitation process. Born out of a deeply personal experience, MedNova was founded with a clear mission: to improve patients' quality of life through advanced technological solutions that simplify rehabilitation and restore independence and dignity. MedNova offers a comprehensive digital health ecosystem, combining innovative smart devices with an intelligent digital platform that allows patients to connect with specialists and track their therapeutic progress securely and accurately.

# MANAGING PARTNER

- With an academic background in chemical engineering, Alazhar is a graduate of Oman's leading startup accelerator and an active participant in various innovation and entrepreneurship programs across the region. He is the patent holder of the Smart Medical Glove for Hand Rehabilitation. Motivated by a personal experience with his late mother, he was inspired to develop a medical device that restores hope and independence for patients recovering from strokes, partial paralysis, and muscular weakness. His goal is to contribute to advancing the rehabilitation sector in healthcare through innovation.

Alazhar Zahir Nasser Al-Jabri  
Founder & General Manager – Tech Innovator

# PROFESSIONAL TEAM

**Marya Al-Kalbani - Head of Marketing**

**Yasser Al-Gharibi - Head of Research & Development**

**Aryam Al-Hinai - Head of Audit & Finance**

# OUR VISION

To become the leading regional company in the field of smart rehabilitation technologies, reshaping the future of tech-driven therapeutic care.

To become a leading smart health technology company in Oman and the region, contributing to improving quality of life through innovative solutions that support digital transformation and enhance the efficiency of healthcare services.

# OUR MISSION

To develop practical and intelligent solutions that enhance rehabilitation outcomes, empowering patients through advanced devices and AI-powered digital platforms.

To provide smart, integrated health solutions that combine advanced devices with digital applications to facilitate rehabilitation and deliver a flexible, safe treatment experience.

# OUR GOALS

Support Oman Vision 2040 in Digital Transformation to contribute to Oman's national goals by promoting digital healthcare technologies and building a knowledge-based, competitive economy.

Develop Innovative Smart Healthcare Solutions to design and deliver advanced smart devices and digital platforms that enhance the rehabilitation experience and improve patient outcomes.

Improve the Quality of Life for Patients to provide accessible, user-friendly rehabilitation solutions that allow patients to safely continue their therapy anytime and anywhere.

Enhance Market Presence Locally and regionally to position MedNova as a leading health technology company in Oman and expand its footprint across the GCC and regional markets.
